MASODOL® 91-8

PRODUCT DATA SHEET

PDS 841180.2.ACTIVE.06172024

PRODUCT DESCRIPTION

Masodol® 91-8 is a linear primary alcohol ethoxylate nonionic surfactant. With its degreasing, wetting, dispersing, detergent, and oil solubilizing properties, Masodol® 91-8 is a unique, multifunctional surfactant for use in a wide range of products and applications.

COMMON CHEMICAL NAME

8 Mol C9-11 Linear Alcohol Ethoxylate

CAS #

68439-46-3

TYPICAL PROPERTIES

Clarity	Clear to slightly hazy
Color (as is), APHA	< 50
Activity, wt.%	> 99
Cloud Point (1% solution), °C	80
HLB	13.9
Solubility in Water	Miscible
Shelf Life	2 Years

APPLICATIONS

Based on short chain, C9-11, linear alcohol, Masodol® 91-8 demonstrates efficient wetting and penetration of soils for improved cleaning performance in a range of detergent formulations. Masodol® 91-8 is an excellent wetting agent, emulsifier, detergent, dispersant and solubilizer that can be used in a broad number of cleaning products including, but not limited to: degreasers, all-purpose cleaners, acid cleaners, dish wash detergents, glass cleaners, I & I cleaners, laundry detergents, paints, coatings, and window cleaners. Formulators may use Masodol® 91-8 as a standalone surfactant or with amphoteric, cationic, and anionic surfactants.

ADVANTAGES

Masodol® 91-8 is on the List of Trade Names of Inert Ingredients Database. Masodol® 91-8 is approved for use as an inert ingredient in pesticide formulations for food use, nonfood use, fragrance use, and is exempt from requirement of a tolerance under 180.910, 180.930, 180.940a*, and 180.960 without limitation.

**Pilot Chemical Company is a listed company with data citation rights for Joint Inert Task Force Cluster 1.*

STORAGE & HANDLING

Refer to the Masodol® 91-8 SDS (Safety Data Sheet) before handling. Avoid contact with eyes, skin, and clothing. Wear appropriate personal protective equipment and observe good industrial hygiene practices. Store in a tightly closed container. Do not store with strong oxidizing agents. Avoid freezing and excessive heat. Recommended storage temperatures are 60-100°F. If exposed to cooler temperatures, product can separate. Mild heat and agitation should bring product back to original quality. Avoid temperatures > 175°F which may cause yellowing of the product. Ensure product is homogenous before use.

PACKAGING

Masodol® 91-8 is available in 450 lb. steel drums and 2200 lb. poly totes.
